ANNEX B - PAYMENT SCHEDULE

1. EVALUATION OF THE LICENCE FEE

The Initial Assessment of the Licence Fee, evaluated on Fee Basis A, B or C as set out below, shall be made by the Licensor and advised to the Licensee after receipt of Licence Request (Form B) and shall be stipulated in the Licence. Unless otherwise agreed prior to issue of the Licence, Fee Basis A (the default basis) shall apply. The Final Assessment of the Licence Fee shall be assessed and paid as set out below.

1.1. FEE BASIS A

Fee Basis A is calculated by reference to the saving in steel cost (the “**Steel Cost Saving**”) generated by the use of the KSP Retaining Walls that are the subject of the Licence. The methodology for assessing the Steel Cost Saving is explained below.

The Steel Cost Saving is the difference between the cost of steel contained in each KSP Retaining Wall and the cost of steel in an equivalent continuous sheet pile wall or “SP” wall in which all sheet piles are the same in section size and pile length as the full-length piles or “kings” contained in the KSP Retaining Wall.

For each linear section of the KSP Retaining Wall with kings of common section size and length [throughout], the Steel Cost Saving is assessed as follows:

- a) Assess the cost of the steel in the linear section of the KSP Retaining Wall (kings & intermediates) = KSP Cost.
- b) Assess the cost of steel in an equivalent linear section of sheet pile wall of the same pile length and section size as the kings* = SP Cost
- c) Steel Cost Saving for linear section = (SP Cost – KSP Cost)
- d) Total Steel Cost Saving = sum of Steel Cost Savings for all linear sections of KSP Retaining Wall.

** For each section of wall with a common section size and depth of kings, apply the SP Cost/linear metre of wall to the actual length of the KSP Retaining Wall section to assess the SP Cost. Where section size or pile length of adjacent kings differs along a single wall, for the purposes of applying the appropriate SP Cost/linear metre, it shall be assumed that the change between the two differing linear sections of KSP Retaining Wall occurs mid-way between the two kings.*

The Licence Fee on Fee Basis A is a sum equivalent to 30% (Thirty Per Cent) of the Steel Cost Saving.

1.2. FEE BASIS B

Fee Basis B is calculated by reference to the cost of the steel (the “**Steel Cost**”) used in the Licensed Works.

The Licence Fee on Fee Basis B is a sum equivalent to 20% (Twenty Per Cent) of the Steel Cost.

1.3 FEE BASIS C

The Licence Fee on Basis C is calculated in the same way as Fee Basis B save that the Licence Fee is a sum equivalent to 15% (Fifteen Per Cent) of the Steel Cost.

1.4 FEE EVALUATION CRITERIA COMMON TO METHODS A, B AND C

- A KSP Retaining Wall may have more than one king adjacent to one another for various reasons, including changes of wall direction or at the end of a wall to suit the required wall extent. Short lengths of adjacent kings within a KSP Retaining Wall are not treated as lengths of conventional SP walls for fee evaluation purposes. [*3D effects mean that, geotechnically, the short lengths act together with the adjacent lengths of KSP Retaining Wall.*]
- Assessment of the Steel Cost shall include the cost of delivery of the steel to the Project site.
- The cost of any re-used or re-cycled steel (whether re-allocated from another project or otherwise) shall be [assessed at the market value for equivalent new steel at the date of assessment].

2. PAYMENT OF THE LICENCE FEE

2.1 An initial assessment (the "Initial Assessment") of the Licence Fee payable under the Licence shall be made by the Licensor based on the planned KSP Retained Walls to be constructed on the Project (i.e. the Licenced Works). The Initial Assessment will be recorded in the Licence and upon completion by the parties of the Licence the Licensee shall pay to the Licensor an Initial Fee of 80% (eighty per cent) of the Initial Assessment.

2.2 Within 14 days of completion of the Licensed Works the Licensee shall provide the Licensor with details of the Licenced Works as constructed, to permit final assessment (the "Final Assessment") of the Licence Fee by the Licensor. The Licensee shall provide such supporting evidence, including drawings, as the Licensor may reasonably require, to enable it to make an accurate Final Assessment. The Final Assessment shall be on the same Fee Basis (i.e. A, B or C used for calculation of the Initial Assessment) and once assessed and agreed by the parties, the Licensor shall notify the Licensee of the Final Assessment.

2.3 The Licensee shall, within 28 days of the date of notification of the Final Assessment under clause 2.2 pay to the Licensor (as a debt) the difference between (i) the amount paid by the Licensee in respect of the Initial Fee and (ii) the amount of the Final Assessment in full and final satisfaction of the Licence Fee under the Licence. Should the Final Assessment be an amount that is less than the amount paid by the Licensee in respect of the Initial Fee at the date of notification under clause 2.2, the Licensor shall refund to the Licensee the difference within 28 days of the date of such notification.

2.4 Should the Licensee fail to provide the details required of him under clause 2.2 above and such failure continues for a further 7 days following written notice from the Licensor, the Licensor (acting reasonably) shall be entitled to make the Final Assessment in the absence of such details. Such assessment shall be notified to the Licensee and after a further period of 14 days (unless otherwise agreed by the Parties) shall be deemed to be the Final Assessment for the purposes of calculating the final amount of Licence Fee due or refundable (as the case may be) under clause 2.3 above.
